PROFESSIONAL SUMMARY

MCA graduate specializing in Artificial Intelligence and Machine Learning with hands-on experience in time-series forecasting, deep learning, and NLP systems. Proficient in Python, TensorFlow, PyTorch, and Hugging Face, with practical exposure to model deployment using Docker and cloud platforms such as GCP and Azure. Passionate about building scalable, data-driven AI solutions that deliver measurable real-world impact.

SKILLS

AI/ML/DL: TensorFlow, PyTorch, Scikit-learn, XGBoost, Neural Networks, OpenCV

GenAI & NLP: Transformers, Hugging Face, LangChain, LLM Fine-Tuning, RAG, BERT, GPT, Prompt Engineering

Data Science: EDA, Feature Engineering, Statistical Analysis, Time Series Forecasting, Visualization

Cloud: GCP, Azure, Docker, Model Deployment

Programming: Python, SQL

Databases: PostgreSQL, MongoDB

Backend Frameworks: FastAPI, Django, Flask

Version Control: Git, GitHub

Others: HTML, CSS, SASS, JavaScript, React

PROJECTS

Predicting Safety Stocks using Machine Learning

- Developed a time-series forecasting model using XGBoost, SARIMA, and LSTM to predict safety stock levels.
- Used historical demand and lead-time data to optimize inventory levels and reduce stockouts.
- Improved prediction accuracy by 12% compared to baseline regression model.

BERT-based News Classifier

- Built a deep learning-based BERT model for multi-class news classification.
- Preprocessed and tokenized text using Hugging Face Transformers.
- Fine-tuned the model and evaluated performance using F1-score and confusion matrix.

AI RAG Assistant using LangChain

- Built a Retrieval-Augmented Generation (RAG) application using LangChain and Hugging Face embeddings.
- Implemented document-based question answering with semantic retrieval and context-aware responses.
- Integrated PDF processing and vector search for efficient knowledge retrieval.

PROFESSIONAL EXPERIENCE

AI/ML Intern – Cyber Intelligence Corps (CIC)

May 2026 – Present | Remote

- Contributed to a production AI system using computer vision, deep learning, OpenCV, and NVIDIA Jetson.
- Developed FastAPI services and React dashboard components for real-time monitoring.
- Implemented facial embeddings, FAISS vector search, Docker-based deployment, and version-controlled workflows.

AI/ML Intern – Edunet Foundations (AICTE Internship)

Apr 2025 – May 2025 | Remote

- Trained and evaluated classification models using Azure Machine Learning Studio as part of an AICTE-Microsoft collaborative AI Program.
- Explored Azure AI Services including automated ML and model evaluation pipelines for supervised learning tasks.
- Completed hands-on modules covering end-to-end ML workflows – data preparation, model training, and performance evaluation.

EDUCATION

Master of Computer Applications (Artificial Intelligence)

Amrita Vishwa Vidyapeetham (Amrita Ahead), 2023 – 2025

Bachelor of Computer Applications

IFIM College, 2019 – 2023

CERTIFICATIONS

- **Microsoft AI & ML Engineering – (Coursera) - 2025**
- **IBM Generative AI Engineering with LLMs – (Coursera) – 2025**

PUBLICATIONS

- **"Role of Data Mining in Customer Relationship Management: A Conceptual Review" -**
International Journal of Research (IJR), Vol. 9, Issue 04, April 2022
